RICHARD DIENER COMPANY, INC.

Originators and Growers of
The World's Finest and Largest
Gladioli and Petunias
KENTFIELD, MARIN COUNTY, CALIFORNIA

October 1, 1924

In the following list we are presenting our Gladioli Novelties for 1925. To give an idea of their high quality, it took about 25,000 seedlings for each new variety produced, all of most carefully figured-out crossings. Every variety has been tested from four to five years and no variety has less than five flowers open at once. The colorings are the most magnificent that have ever been produced and most all of the blooms are of very large size. We are certain that no other firm in the world has anything to offer as perfect and of such high quality as ours.

Only large (and medium sized bulbs while they last) will be sold this year. All smaller sizes will be needed for propagation.

CANADIAN CUSTOMERS PLEASE NOTE!

In accordance with the ruling governing the importation of Nursery Stock from the United States into Canada, it will be necessary for you to obtain a permit from the secretary of the Destructive Insect and Pest Act Advisory Board, Department of Agriculture, Ottawa, and file same with the Collector of Customs before shipment can be cleared. Seeds are exempt from this ruling, and may be shipped into Canada without a permit. Gladiolus bulbs come under the classification of Nursery Stock.

This ruling must be complied with in order for us to make delivery, and we therefore ask you to secure the necessary permit and present the same with the Collector of Customs at the port of clearance. It is also necessary that we mark the number of your permit on the outside of the package. Please notify us as to the number, and retain the permit.

**LARGEST GROWERS OF PETUNIA SEED ON THE PACIFIC COAST**

Petunias—Diener's Ruffled Monsters. Seedlings in 3-inch pots twelve weeks after sowing.

Plants in 3-inch pots like those above sell at sight, as people just want them. The easiest and surest money-makers on the market.

SEEDS**DIENER'S WORLD FAMOUS PETUNIAS
RUFFLED MONSTERS**

Diener's world famous Petunias are proving to be the greatest sensation among flower novelties. They have been shown at almost all flower shows in the United States, Canada, Australia and New Zealand, as well as in Europe, and have received highest awards for their large size and perfection. The varieties that we are offering have been again greatly improved in size and coloring. We are also presenting many new double varieties.

All of our seed is raised in lath houses where insects are excluded, and the flowers are pollenized by hand, this being the only way to get seed that is true to type. As Petunias constantly revert to the old type, it is useless for anyone to raise his own seed, as in most cases the results will be poor. It requires long years of experience to know their habits, and to overcome the effects of reverting. We raised 11,000 Petunia plants in 6-inch pots for seed this year.

Our Petunias will flower all the year around, making them of great value as a cut flower, especially for Commercial purposes.

SPECIAL ATTENTION: We wish to emphasize the fact that it is far better to order Petunia seed before zero weather sets in, so that there will be no danger of it being damaged by frost while in the mail. We pack the seeds as warm as possible so that they will be protected from freezing, but in December, January and February, in localities where the temperature goes below zero, we would recommend to have the seed shipped the latter part of November to insure its safe arrival. (When ordering, order by number.)

TRITOMA—DIENER'S HYBRIDS (Red Hot Pokers) A Novelty of 1925

Tritomas ranging in all colors from yellow and coral through all the shades of orange and scarlet. The most vivid colorings imaginable. The flower heads are from 8 to 16 inches long and the stems are from 4 to 6 feet tall. A few of these will be a great addition to the garden, as a single plant attracts great attention. Plants are raised from seed as easily as grass. No special efforts are required.

CARTER'S SUNRISE TOMATO

A very early but small variety; round as an apple. Grows about ten tomatoes to a cluster. A greenhouse variety, good for forcing under glass, pkg.....\$.25

THE DIENER TOMATO "KING OF ALL TOMATOES" "Blight Resisting"

This variety, originated by Richard Diener in 1917, is absolutely "Blight Resisting." The weight of the first fruit reaches about three pounds each, the average fruit one pound. The flesh is more solid than any other tomato now known, and does not contain hollows. It is free from the acid taste. The yield is enormous, and is not reached by any other variety in existence.

DAHLIA SEED

Selected from the most modern types of Dahlias. This mixture contains all colors. Dahlias will bloom two months after sowing, and will produce plants larger than those from tubers. For this reason ample garden space must be allowed for spreading. 50c per pkg. (100 seeds.)

DAHLIA SEEDS FROM MRS. CARL SALBACH'S SEEDLINGS

The new Dahlia—Mrs. Car' Salbach—is in our opinion the longest and strongest stemmed Dahlia we have ever seen. Mr. Diener has made a great many crosses with the Mrs. Carl Salbach Dahlia, using the pollen of the very finest varieties, and succeeded in raising several thousand seedlings with a percentage of 95% double and of coloring beyond description. We are therefore able to offer something extraordinarily fine in Dahlia Seed.....\$3.00 per pkg. (100 seeds.)

DIENER'S HYBRID FREESIA SEEDS

The size of the flowers are from 2 to 3 times larger than Freesia Purity, from snow white, lilac, lavender to deep blue and yellow in all colors of the rainbow. Having strong stems, they are the highest perfection of freesias today.

DIENER'S 1924 DELPHINIUM HYBRIDS

They are positively the finest and largest flowering varieties ever sent out. They form immense long spikes with many side spikes and ranging in all colors from pale blue to very dark blue, single flowers from two to over three inches in diameter. Many of the seedlings are entirely free from mildew, and the majority are little affected by it. We especially recommend this strain for cut flower and bedding purposes.

TESTIMONIALS

Richard Diener Co., Inc.,
Hollister, Cal., January 8, 1923.

Dear Sirs:—It might be of interest to you to know that I was presented with eight acres of your plants last year and had a most satisfactory yield. Sold 101 tons and gave several tons away. Did not irrigate. Largest tomatoes weighed 2 3/4 lbs. each. Many boxes of 45 tomatoes weighed 60 lbs. each. Cannery was always pleased to see my truck unload. Was not docked once. Many vines yielded over two boxes to a picking.

Yours,
HERBERT A. SCHULZE.

Gentlemen:

Last Spring I bought of you a package of Ruffled Monster Petunia seed and sowed them March 31st. July 1st I had some 40 plants and a number of them in bloom and such flowers I never expected to see; the colors and markings were simply marvelous and six inches and over in diameter. All who saw them were amazed at their size and beauty, and now at time of writing (September 17) I have before me a large bouquet of them as fine and large as ever. Your description of them was in no wise exaggerated.

Yours truly,
E. H. KING,

PRIMULA MALACOIDES DIENER HYBRIDS

These are the results of three successive crosses between Primula Malacoides and Primula Obconica. The flowers are two to three times larger than Primula Malacoides and the colors are much deeper. These flowers are favorites for pot plants and winter cut flowers.

AZTEC BEAN

The Aztec Bean is one of the largest beans known. It grows in bush form, like the Lima, and is a perennial in places where it is not too cold or frosty. The flavor is unexcelled and may be used as a green vegetable or cooked as a dry bean like the Lima. An early spring frost will not harm the Aztec Bean. 50c per package.

VANDERBILT'S HYBRIDS

These new Delphiniums produced by Newell F. Vanderbilt of San Rafael, California, are a cross between the California wild Delphinium (which are absolutely mildew free) and some of the best varieties in existence. The result is an almost mildew free Delphinium. They are immensely valuable for the production of cut flowers, as they give three successive crops in one summer, and all summer long are full of fine long spikes. They are suitable for cutting as well as for bedding. We are the sole distributors of this strain. They come in all shades from light to dark blue. Almost all colors are iridescent, and the flowers of largest size. Try a package of this seed and you will never regret it, for they are sure moneymakers.

Gentlemen:

In the Spring of 1922 I ordered a few things of you, among them a package of Dahlia Seed, one of your blight-resisting tomatoes, and a package of mixed Petunias. I just want to say that I got more pleasure and satisfaction for the amount invested in these seeds than in any purchase I ever made. Being a seed man in the Middle West for twenty years, I tried and experimented quite a lot with new varieties, but with no such success as I had with the above mentioned items. We are now, and did last year, eat fresh tomatoes all thru the Christmas Holidays right off the vines. The Petunias I planted in the spring of 1922 are blooming today out in the open ground. The package of Dahlia seed, I got seven Dahlias, each one of which was worth the price of the entire order several times over.

Dear Sirs:

If our success with your seeds is as great as that with your bulbs, words fall short. Jack London surely is a favorite and Anna Eberius was one of the first prize winners at the Mississippi Valley Fair and Exposition, 1923. We were proud of that winner of the BLUE RIBBON.

Yours truly,
GEORGE H. HERMANN, Jr.
